

RESEARCH OPERATIONS, MANAGEMENT & STRATEGY FELLOWSHIP

PREPARING FUTURE LEADERS IN RESEARCH & STRATEGY

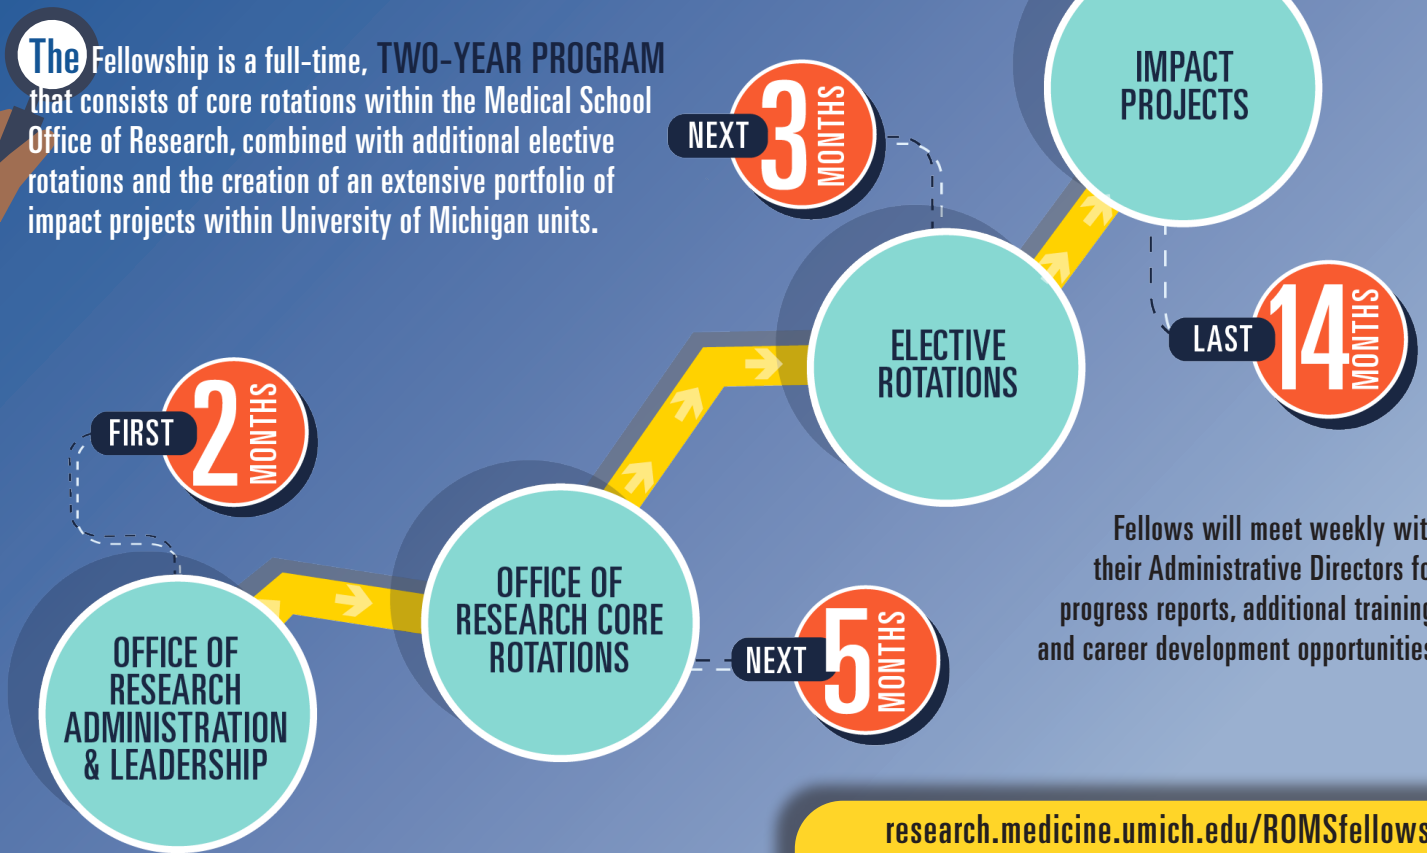

The Research Operations, Management & Strategy Fellowship, formerly known as the Research Administration Fellowship, prepares PhDs in the life sciences to launch successful careers in research administration. It leverages the extensive biomedical research enterprise at the University of Michigan Medical School and provides a unique opportunity to work closely with Medical School leaders, providing professional experience and skill-building. Fellows learn to connect science and business competencies to engage in innovative projects, positioning them for careers in project & program management, research & business development, research administration, and more.

Join the ROMS mailing list to be notified of future Fellowship information sessions and application information:

HOW IT WORKS

The Fellowship is a full-time, TWO-YEAR PROGRAM that consists of core rotations within the Medical School Office of Research, combined with additional elective rotations and the creation of an extensive portfolio of impact projects within University of Michigan units.

Fellows will meet weekly with their Administrative Directors for progress reports, additional training, and career development opportunities.
